

# Triangle Accelerates Growth with Copley's FDA Extended ERP Solution

“With Copley and Infor, we have successfully implemented a solution that provides real-time production feedback, allowing us higher visibility into margin contributions while enhancing our planning and scheduling. We feel the efficiencies we have gained with the Infor and Copley FDA solution will accelerate our growth trajectory, while maintaining our core values of quality and delivery performance.”

- Dax Strohmeyer, President at Triangle Manufacturing Company

## About Triangle

Triangle Manufacturing Company Inc. was founded in 1955 and continues to bring to life a wide range of medical instrumentation and implantable devices at a time when reliable sourcing is more important than ever. Triangle's work impacts almost every part of the human body, demanding a level of precision and quality unlike any industry.

The company implemented The Copley Consulting Group's FDA Extended Solution based on the Infor CloudSuite™ Industrial (CSI) Enterprise Resource Planning (ERP) application. The new ERP solution replaced Triangle's disparate systems and manual processes, providing the functionality needed for them to improve production cycle times and shop floor efficiency to support their aggressive growth goals. Triangle now sees the opportunity to more effectively on-board new customers at a faster rate, fueling their objectives of both top line and bottom line growth in a competitive and highly nuanced medical device sector.

To find out more about Copley's FDA Extended Solution or to schedule a demo contact us at [sales@copleycg.com](mailto:sales@copleycg.com).

## Business Challenges

- Lacked a unified platform for FDA Regulatory compliance
- Disparate systems and manual processes
- Poor cycle times and shop floor efficiency

## Benefits

- Implementation of the Copley FDA Extended ERP solution has provided higher visibility into demand forecasting and quality control
- ERP solution replaced Triangle's disparate systems and manual processes, improving production cycle times and shop floor efficiency to support aggressive growth goals
- Able to more effectively on-board new customers at a faster rate, fueling their growth objectives
