

Pacific Timecard workforce management application has enabled a home healthcare company client to do exactly that. It monitors their staff of caregivers and documents time spent at each patient's location, recording patient data and tracking their mobile staff's location using GPS technology. This client, from the state of California, employing over 100 employees, has taken advantage of Pacific Timecard's real-time data and access to over 30 reports. Their Operations Manager is thrilled to be ahead of the Medicaid Electronic Visit Verification (EVV) regulations while preventing fraud in the industry.

For more information regarding Pacific Timecard Mobile application please contact sales@americantimeandlaborcompany.com or 800-456-5494.
