Loudoun County Public Schools Selects Copley & Qlik for Student Success

> " Implementing Qlik with the help of Copley has allowed us to have a 'data scientist in a box' solution for the entire district. Previously we would struggle with identifying the type of help students would need to succeed. Now we have the potential to capitalize on the data to make a difference in our student's lives. We're looking forwarding to reaping the benefits of the Qlik platform this coming school year."
> -Rachel Johnson, Director, Information Management and Data Security, Loudoun County Public Schools

About Loudoun County Public Schools

Loudoun County Public Schools (LCPS), is one of the fastest growing districts in the Commonwealth of Virginia. Established in 1870, LCPS is located in the rapidly growing Washington metro-area. Each year, approximately 2,500 new students enroll in the school system, and one to three new school facilities are opened to accommodate them. Forbes magazine ranks Loudoun County as the wealthiest county in America with a per capita income of $125,900. Smartasset.com ranks Loudoun County the happiest county in America, using an index that considers metrics including physical health, family stability and economic security.

LCPS was utilizing a data system that was difficult to maintain with a decommissioned data warehouse platform. The district was looking to implement a data governance to track data elements such as discipline, missed assignments and grade below a certain level as triggers to a performance issue. This type of process is helping determine the proper actions need to help a student succeed.

To find out more about Copley's Qlik Solution or to schedule a demo contact us at qlik@copleycg.com.

Business Challenges

- Low utilization and difficult to maintain data systems
- Decommissioned data warehouse platform
- Struggle to identifying students who would need help to succeed

Benefits

- Implemented the Copley Qlik Solution to integrate multiple sets of data and have real-time access to the right data
- The district is forming DICE (Data Integration Center of Excellence) teams across instructional and administration groups
- LCPS now has the ability to identify at-risk students, so they can determine those who need specific intervention in real-time
