

# Manufacturing ERP software that gives you a live look at your business

Get the data you need when you need it with a manufacturing ERP that moves as fast as your sales and inventory. Combining a visual interface and smart real-time master planner, Katana makes managing inventory and manufacturing intuitive while connecting to all the services you know and love.

## Why thousands of manufacturers choose Katana

### +82%

**Increase in productivity**

Manufacturers use Katana to do more with less by automating repetitive tasks and minimizing waste.

### <7 days

**Implementation time**

Implementing Katana is easy, whether on your own or with the help of our dedicated onboarding team.

### 4.8/5

**Average customer rating**

Our ratings on top review platforms speak for themselves and place us at the top of our industry.

### “

*We knew we needed more than spreadsheets but didn't like the idea of paying a crazy amount for a huge system we would not fully use, and Katana was what we needed without a ton of fluff. Having a system track inventory and what stage it is in is incredibly helpful and has helped our team clearly delineate the order of operations for each product in our catalog.*

**Sarah Zinger**

Director of Production Logistics  
Computer manufacturing

### “

*Katana gave us better control over our business by streamlining production and fabric inventory management. We chose Katana because it seemed to be the most user-friendly software we tried. And that has proved to be true - it is very easy to use and the customer service is great!*

**Candice Murno**

Founder and Designer  
Apparel

### “

*As an organic food processor, traceability is a critical requirement, and our records must be meticulously kept. As one integrated solution, Katana replaced our many spreadsheets. Also, the integration with our Shopify store and accounting software was a key consideration, and Katana fulfills all these needs in a simple, easy solution.*

Founder and Production Manager  
Food processing

## Real-time master planning

Track inventory in real-time and automate raw material and product allocation for quick and easy sales order fulfillment. Katana keeps track of demand and adjusts your production schedule to align your manufacturing operations and deliver maximum efficiency.

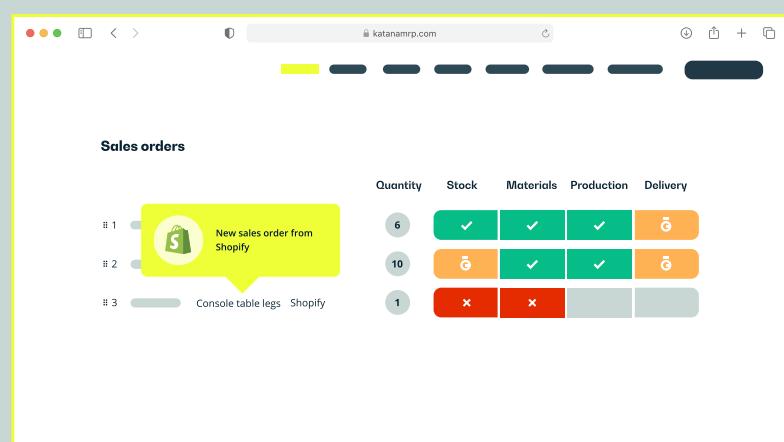

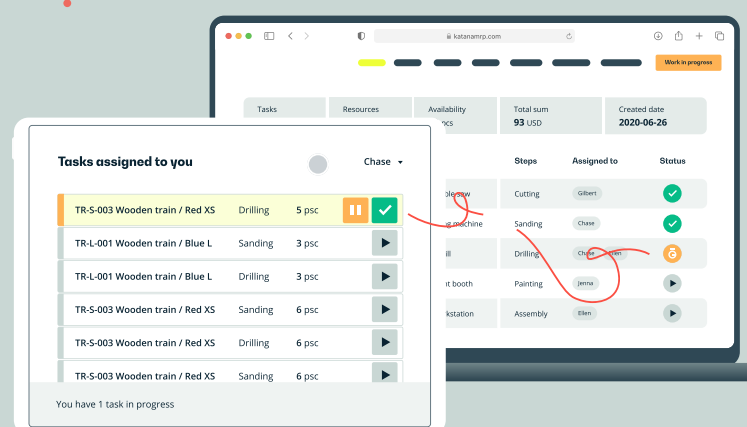

## Live inventory management

Monitor inventory movements by setting up reorder points and prioritizing your sales orders. Katana integrates with e-commerce platforms like Shopify and WooCommerce to prevent stock-outs and keep your products moving, no matter how high demand is.

## Total shop floor control

Improve floor-level operations with direct access to production tasks and ingredient lists for Katana manufacturing orders in the Shop Floor App. Create, set up, and remove shop floor operators, track time spent on jobs, and measure real vs. actual materials used to cut costs and time.

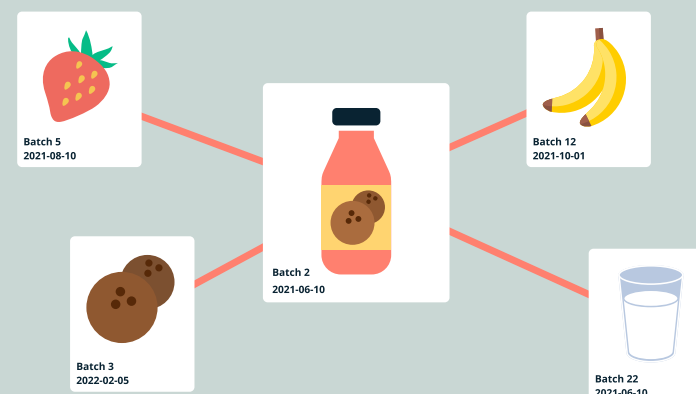

## Multiple sales channel support

The future of manufacturing is flexible, diverse, and omnichannel. Katana supports sales order fulfillment for made-to-order and made-to-stock workflows simultaneously, centralizing your e-commerce and B2B operations and giving you total visibility.

## End-to-end traceability

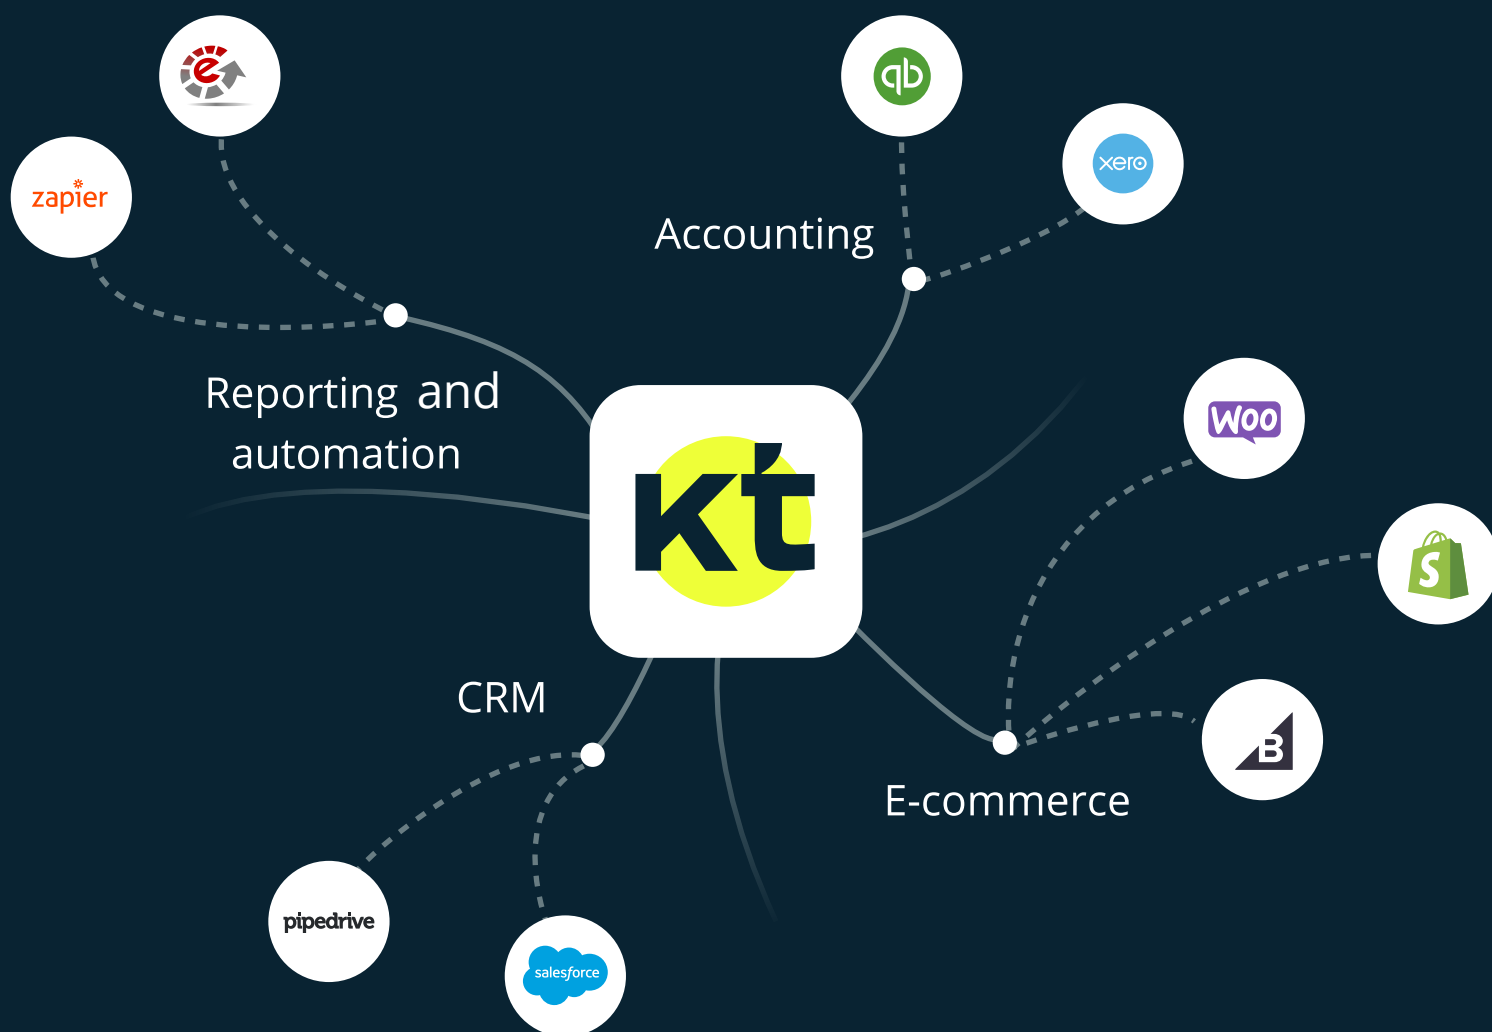

Optimize your supply chain with features designed to give you full traceability throughout your entire product lifecycle. Katana supports batch tracking for manufacturing, purchasing, and sales orders, ensuring industry compliance and visibility when it comes to tracking your perishable stock.
