LEADING THE INDUSTRY AND CUSTOMERS TO NEW SUCCESS.

PCG takes INFOR and Baan to the next level of digital and business transformation, delivering new business velocity and innovation to solve business challenges.

CONSIDERING INFOR?

INFOR solution platforms bring proven business functionality, cloud-based flexibility, great integration options and room to grow. But, INFOR is only one-half of the solution needed for business and digital transformation.

To complete the solution and achieve your objectives, your business requires the right experience, skill, product knowledge and resource that predictably aligns INFOR to your business. You need a selection, implementation and management partner that will ensure transformation success.

PCG DELIVERS INFOR VALUE.

PCG is the largest independent Baan and INFOR consulting and implementation company in the world. We know INFOR, industries, business and what it takes for project success like nobody else.

Only PCG brings the industry, business, product and experience-based knowledge to deliver sustainable INFOR platform success for real, value-added business and digital transformation.

In fact, PCG is the only INFOR Alliance Partner that delivers business sustainability, increased business velocity and the ability to creatively innovate new solutions to business challenges.

Why would you risk your business by using any other organization for your INFOR project?

PCG INFOR SERVICES.

As a valued INFOR partner, our customers tell us that we consistently and predictably deliver project success and sustainable value to their business.

Our **SUSTAINABILITY**PCG Solutions—a full, robust set of services, designed around your business requirements—ensures your INFOR platform decision meets your requirements and is on-time and on-budget.

Where does PCG make INFOR work?

- Aerospace & Defense, Automotive, CPG/Retail, High-Technology, Life Sciences, Manufacturing and Warehouse Distribution

You have spent a lot of money, time, energy and resource on your INFOR and CLOUDSUITE platform decision and transformation project.

Is a 50% digital and business transformation solution good enough? We don't think so.
