

OPUS LAB MODULE - INTEGRATION FOR BEHAVIORAL HEALTH FACILITIES

About Us

OPUS EHR CONNECTS WITH YOUR LAB PARTNER FOR SEAMLESS TEST ORDERING

With Opus EHR's Lab Module, the integration allows your facilities to order lab tests and receive results directly in Opus EHR, eliminating the need to use the lab's portal and separate logins. Opus EHR makes it easy for users to quickly order tests, track, and receive results without ever leaving our platform. No more duplicate logins to Opus EHR and your lab – do it all in Opus EHR instead.

How This Works

SAVE TIME AND MONEY AS OPUS EHR ENABLES FAST INTERACTIONS WITH YOUR LAB PARTNER

We sync your information and get your patient results quicker through Opus EHR. Orders are submitted to your lab in real-time and results appear in Opus EHR the minute they are reported by your lab partner.

OPUS LAB MODULE SIMPLIFIES YOUR PROCESS

MAXIMIZE EFFICIENCY

Save time by not having to log in to separate portals to manage lab orders and results.

BETTER PATIENT EXPERIENCE

Clinicians can access results easily and patients benefit from faster diagnosis and plans of action to treat their needs.

ACCESSIBLE RESULTS VIA DEVICE

If necessary, Clinicians can share lab results with patients directly on their computer or mobile device.
