OPUS EHR

Opus EHR is a complete clinical solution that empowers clinicians to customize, measure, assess, and treat SUD and behavioral health treatment centers. With everything in one secure, HIPAA-compliant environment, we help you customize treatment workflow, and optimize your clinical and operational processes, including intake, admissions, and documentation.

Providing a solution for facilities to increase efficiency and quality of care in a complex and ever-changing healthcare environment. Where your clinical team will have greater control over data that matters to improve patient satisfaction and organizational efficiency. Opus supports treatment centers by connecting client admissions and workflow processes, clinical operations, and billing services. Centralization results in more time with your patients and less on your systems, leading to higher profits for your organization.
