

IS ERP FOR ME?

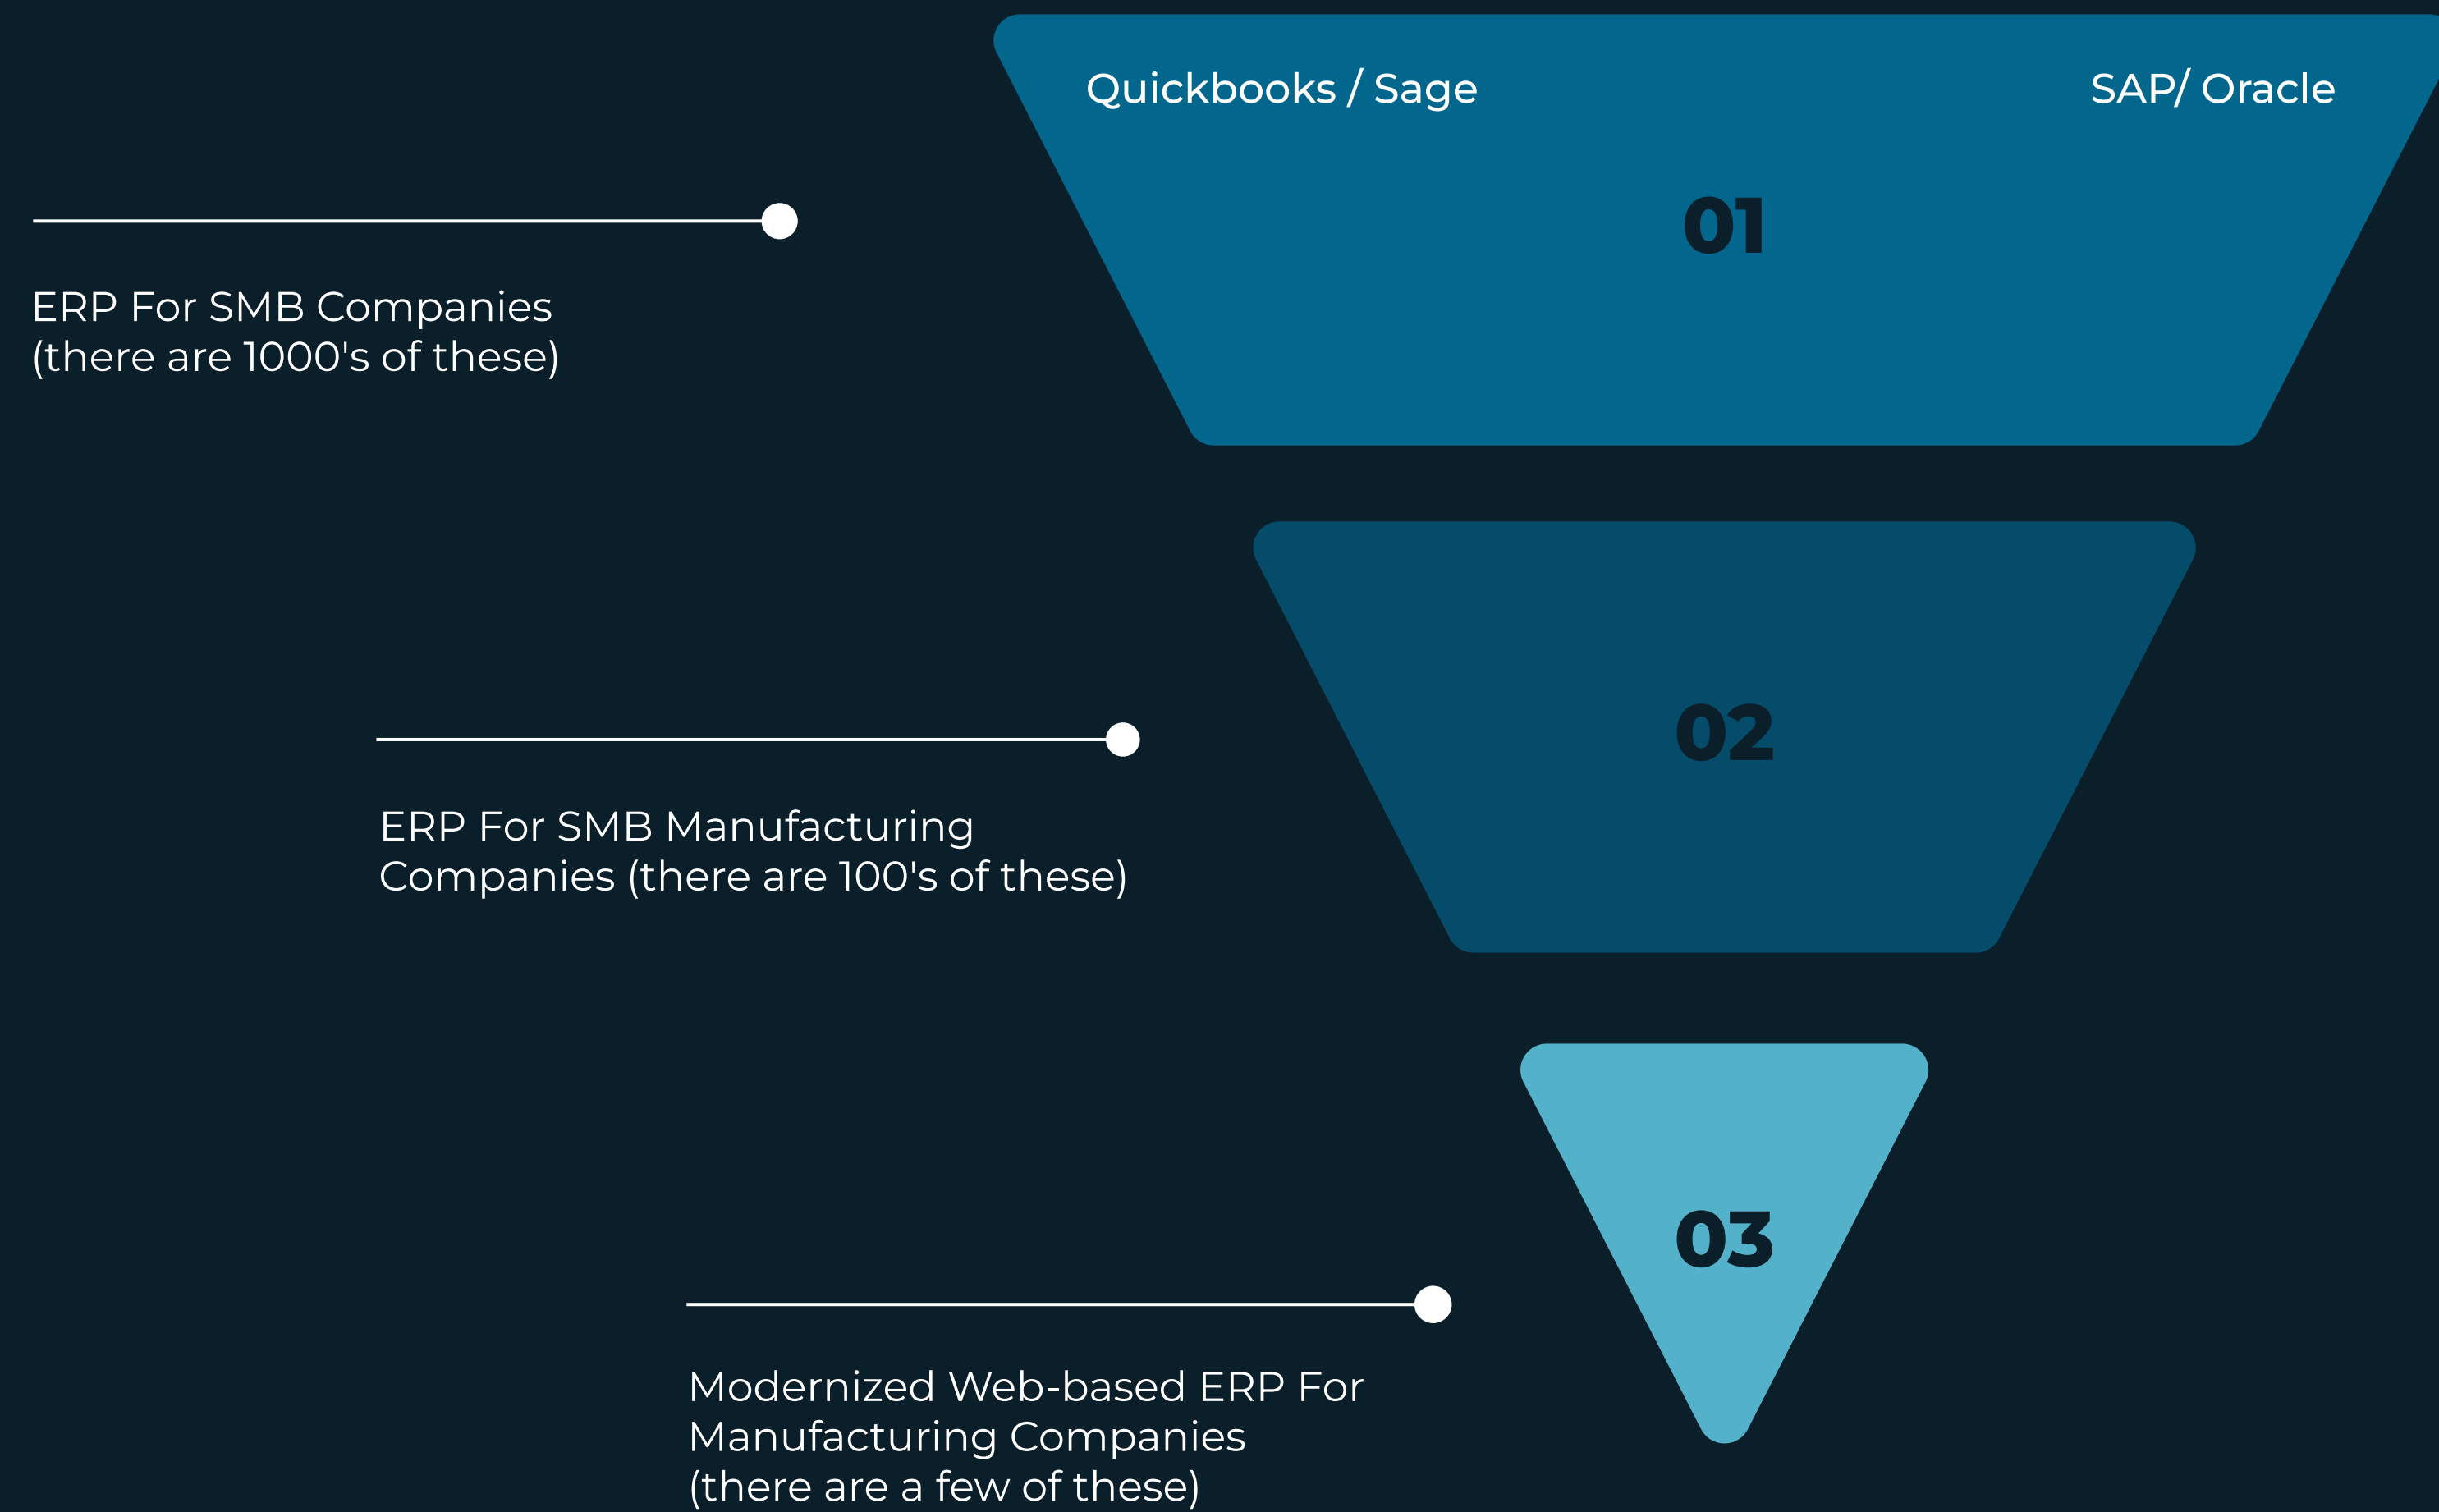

ERP puts your data and processes into a centralized environment, so it's fast and easy to find things, making it possible for you to grow and scale the business.

IS ERP FOR ME?

ERP puts your data and processes into a centralized environment, so it's fast and easy to find things, making it possible for you to grow and scale the business.

What happens when you Google search for ERP?

Even after sifting through the vastness of google search results, you'll still want to evaluate which "modern, web-based ERP for manufacturing" software (and support provider) is best for your company.

Contact our sales team if you'd like an **evaluation matrix** that compares different options to Cetec ERP in as impartial and transparent a manner as we could muster. You should consider factors like:

- Is it user friendly?
- What is the net cost? Any hidden costs or fees? What about soft costs?
- How innovative is the technology under the hood?
- How friendly and knowledgeable and direct are the support staff?
- Is it full featured and fully integrated? What about accounting/financials?
- Can it handle my unique production tracking requirements?
- Is it a full manufacturing system or just a plug-in?
- Is it flexible and customizable? Is it expensive to customize?
- Is it a good fit for my particular manufacturing industry?

| | Cetec ERP | NetSuite / Acumatica | Sage100c / Quickbooks / MiSys / Fishbowl | Plex MFG / Infor Syteline CloudSuite | Odoo | E2 / Job Boss / Visual / RealTrak | Epicor / GlobalShop / IQMS |
