VisMobile Shop Floor Labor Collection
24x7 Shop Floor Collection

Visibility Into Your Labor Costs

The manufacturing environment demands reliable, accurate tracking of labor costs. VisMobile Labor provides you with "visibility" into your labor costs through it's real time tracking technology that simplifies the labor collection process by utilizing barcoding in labor transactions. VisMobile Labor supports attendance, timesheet, and time-clock methods as well as supervisor approval functionality.

Through VisMobile Labor, employee time can be collected on a real time basis. VisMobile Labor is intended to address the needs of manufacturing shop floors with the necessity to control Employee-Badge and Time-Clock data entry in a multi-shift 24x7 environment.

This solution lets shop floor employees enter their time directly into Visibility ERP through the use of a barcode scanner. It provides shop users with the ability to perform keyboard-less labor entries.

VisMobile Labor provides manufacturers with the ability to track their actual job costs by directly tracking the labor of each work order. It also allows for simplified labor tracking through bar coding which removes the need for handwritten or manual labor entry processes, thereby improving efficiency in tracking time and reducing manual errors.

Architecture and Technology
»Visibility ERP Application and SQL Server DC Application

Benefits
»Increases accuracy of labor entries
»Collects employee time on a real-time basis
»Reduces manual tasks
»Improves time sheet and time-clock methods
»Tracks labor costs automatically

Key Features
»Manages and tracks attendance (shift) clock-in/out.
»Allows serial-mode (single-job-at-a-time) job clock-in/out.
» Supports attendance, time sheet, and time-clock methods
»Supervisor approval functionality via standard Visibility ERP time sheet forms.
»Automated "snap-to-paid-time" adjustments for attendance clock-in/out.
»Automated generation of indirect charges for "between-jobs-gap-time."
»Automated notifications for early/late attendance clock-in/out.
»Automated supervisor clock-out-all function.
»Automated supervisor correction function.

Automate Labor Management

VisMobile Labor includes features designed to make labor management less laborious. We support attendance, timesheet, and time-clock methods.

In addition, VisMobile Labor includes supervisor approval functionality and provides automated notifications for early/late attendance. It offers serial-mode (single job at a time) and concurrent-mode options to accommodate the varied needs of manufacturers.

Shifts of varying hours can be setup within VisMobile Labor to accommodate the 24x7 manufacturing environment and better track employees.

VisMobile Labor provides automated supervisor clock-out all functionality, automated generation of holiday charges, and supervisor correction functionality. Lunch and other breaks can be set up within the system for any and all shifts and employees.

Increased Accuracy of Labor Entries

By collecting labor through barcoding, the risk of human error is dramatically reduced, thereby improving the accuracy and reliability of labor records.

Visibility into Job Costs and Employee Productivity

Many manufacturers can't identify their actual job costs or measure the productivity of shop floor employees. With VisMobile Labor you can do both. Set up time and production time can be measured accurately with VisMobile Labor along with indirect gap time charges between jobs.

Employee arrivals, departures, and start/end times can be monitored and measured accurately and then analyzed to ensure any attendance or productivity issues are identified and shop floor productivity is optimized.

Employee Satisfaction

Simple bar code tracking of labor allows your employees to focus on their work, not on recording their time through manual processes.

About Visibility

Visibility Corporation is a solutions company working towards the singular goal of enabling our manufacturing customers to achieve operational excellence. We provide a modern, flexible, fully integrated enterprise resource planning solution designed specifically for manufacturers of complex products. Our more than 30 years of experience with our customers' unique requirements in the manufacturing industry are built into our Visibility ERP solution. We develop, implement, and support Visibility ERP ourselves, eliminating 3rd parties. We embrace and excel at customizations because we believe your ERP solution should work for your business, not the other way around. As a family owned and operated business, we treat our customers as a part of our family. With a deep understanding of the manufacturing industry, Visibility ERP provides manufacturers with visibility into their business operations, allowing for enhanced performance and increased profits. It's a simple solution for complex manufacturers. For more information, connect with Visibility or visit www.visibility.com.
