

# Visibility Schedule Advisor

## Graphical Drag and Drop Scheduling Application

### Manage Load and Capacity To Optimize Shop Floor Efficiency

Visibility Schedule Advisor is an add-on graphical scheduling application that can be used with Visibility ERP. It interacts with the current Shop Floor and Work in Process applications, allowing a user to compare scheduled and planned production to available capacity.

Schedule Advisor also manipulates shop routing operations, capacity, and production schedules in order to identify and correct scheduling issues. Visibility Schedule Advisor enables users to quickly examine the shop floor reality of the need to move jobs to various work stations in order to resolve capacity issues.

Schedule Advisor also provides comprehensive shop floor control capabilities to enable full definition of routings along with primary and alternate work centers, man/machine resource costing capabilities and the ability to manage sub-contracted operations.

By reacting in real time, Schedule Advisor allows you to identify and correct scheduling issues and pivot quickly when the need arises. Schedule work orders with routings and enforce operation sequences and word order hierarchies with this tool. It allows users to compare schedule and planned production to available capacity.

### Benefits

- »Manages load and capacity
- »Enforces operation sequences and work order hierarchies
- »Firms the schedule and imports into Visibility ERP for execution

### Key Features

- »Graphical Drag and Drop Scheduling Application
- »Complement to Visibility Shop Control and Work in Process applications
- »Identifies overloaded work stations and drag loads to alternate dates and/or work stations
- »Simulates changes to work station capacity
- »Tool to assist with strategic decision making
- »Serves as a visual dispatch board that can be deployed at work stations
- »Allows users to compare scheduled and planned production to available capacity
- »Reacts in real time to changes and interruptions to identify and correct scheduling issues
- »Schedules work orders with routings

# Graphical Drag and Drop Scheduling Application

## Improved Efficiency

Schedule Advisor allows for more efficient production on the shop floor by allowing users to manage shop floor load and work stations, identify bottlenecks, plan for preventative maintenance, adjust for unplanned machine downtime, meet production deadlines, and keep customers happy.

## Improved Visibility

Schedule Advisor enhances your visibility into plant level scheduling and utilization and provides tools to react in real time as needed. Its dashboard functionality allows your shop floor users to see production schedules from their work stations. Planners can adjust production schedules as needed by dragging and dropping work orders to alternate dates and/or work stations.

## Improved Strategic Decision Making

Schedule Advisor augments the already robust finite scheduling capabilities within Visibility ERP. It enables production planners to know in advance that their schedules are achieving optimal efficiency and is a tool to assist with strategic decision making.

## A Modern Solution for the Modern Manufacturer

- »Simple & capable
- »Drag & drop functionality
- »Visual dispatch board
- »Manage load vs. capacity
- »Reacts in real time to changes and interruptions to identify and correct scheduling issues
- »Tool to assist with strategic decision making
- »Test scheduling scenarios
- »Reduce costs
- »Shorten cycle time
- »Identify and manage overload scenarios
- »Prepare for planned and unplanned machine down time
- »Graphical drag & drop scheduling application
- »Maximize shop floor efficiency by managing load & capacity
- »Visual dispatch board to provide employees & managers with real time updates regarding work order scheduling, changes, and progress
- »Simulate changes to work station capacity
- »Firm the schedule and import into Visibility ERP for execution

## About Visibility

Visibility Corporation is a solutions company working towards the singular goal of enabling our manufacturing customers to achieve operational excellence. We provide a modern, flexible, fully integrated enterprise resource planning solution designed specifically for manufacturers of complex products. Our more than 30 years of experience with our customers' unique requirements in the manufacturing industry are built into our Visibility ERP solution. We develop, implement, and support Visibility ERP ourselves, eliminating 3rd parties. We embrace and excel at customizations because we believe your ERP solution should work for your business, not the other way around. As a family owned and operated business, we treat our customers as a part of our family. With a deep understanding of the manufacturing industry, Visibility ERP provides manufacturers with visibility into their business operations, allowing for enhanced performance and increased profits. It's a simple solution for complex manufacturers. For more information, [connect with Visibility](#) or visit [www.visibility.com](http://www.visibility.com).
